Director of the Information and Communication Headquarters (Official seal is omitted)

Guidelines for Entry and Notes

- Purpose of Use

Please enter the use of web server, mail server, etc. for your department.

- Host Name:

Please specify a host name including the domain name.

- Reverse DNS Lookup Configuration

Please select whether reverse DNS lookup configuration is necessary.

- Desired Disk Size

Please select the disk size to be used for the overall virtual server, including the OS, etc.

- Desired Memory Size

Please select the memory size that the virtual server will use.

- OS to be used

Please select the OS to be installed on the virtual server.

CentOS / Windows Server

* If you select a Windows Server, the user is required to prepare it.

If you want to use another OS or to specify the partition, please consult us separately.

The OS is installed by the Information and Communications Headquarters.

Swap size of UNIX-like OS requires two times more memory size than a standard OS.

- Initial User ID

Please specify one user ID that is created when installing the OS. We will configure this ID with administrator privileges. The initial password will be communicated separately.

- Client IP address that is allowed to connect using SSH or RDP

When installing a UNIX-like OS, clients that can connect using SSH will be restricted by IP address.

Please enter the IP address of the SSH client whose connection is allowed. If the OS is a Windows Server, it will restrict the clients who can connect using RDP

- One IP address is assigned to a virtual server.

- One virtual CPU is assigned to a virtual server. If two or more CPU pieces are necessary, please consult us separately.

- We perform a security audit using an audit tool once a year and the results will be reported to the manager. The audit may be performed as needed.

Table of Charges (Annual amount (yen))

		Disk Size				
		20GB	40GB	60GB	80GB	100GB
Memory Size	1GB	12,000	18,000	24,000	30,000	36,000
	2GB	24,000	30,000	36,000	42,000	48,000
	3GB	36,000	42,000	48,000	54,000	60,000
	4GB	48,000	54,000	60,000	66,000	72,000

Note 1: If two or more virtual CPU pieces are necessary, 12,000 yen will be added per additional CPU.

Note 2: The initial business year of use is free of charge. The annual charges for the following year and after will be paid by university expense transfer. If the user cancels the use of the service during the business year, no return of charges is made, such as calculating the charges by the number of months that the user used the service.

Note 3: If the user wishes to cancel the use of service at the end of the business year, please submit a Notification of Cancellation by the end of February of the business year in question.
